## CRIME TOKEN PLACEMENT:

Continuing with the sample challenge at the top of the page, place the Poop Crime Token on top of the Poop Crime Token position on the Game Board, as shown.

## **YOUR GOAL:**

Use the clues given to place the Dogs around the edges of the Game Board and determine the identity of the guilty Dog.

## **HOW TO PLAY:**

Read each clue on the Challenge Card. Determine the placement of Dogs that would satisfy all of the clues listed. Once you've placed all the Dogs around the edges of the Game Board and can name the Dog sitting in front of the Crime Token—you've caught the Dog culprit—**YOU WIN!**

## **INTERPRETING THE CLUES:**

Each clue references a specific Dog, an identifying trait, a position relative to a specific crime, or an item of Supporting Evidence illustrated on the Game Board.

Each Dog has two identifying traits that may be mentioned in the clues. These traits are listed in the Dog Bios on pages 3-5.

The Game Board contains six Crime Token positions, plus illustrations of six types of Supporting Evidence. (See "Game Board Legend" on pages 6 & 7.) Each type of evidence appears twice, and each space on the Game Board includes a different combination of two forms of evidence.

## SUPPORTING EVIDENCE:

You're now ready to begin solving Dog Crimes!

## CRIME SOLVING GUIDE:

- If a clue says one or more Dogs were “playing in the yard,” this means the Dog(s) will not be used in the Challenge. If a Dog is not mentioned in any of the clues, he or she will still be used in the Challenge.

- If a clue says a Dog was sitting “in front of” something, this means the Dog is placed at the Dog Token position closest to that item.

Ace is sitting in front of a tennis ball and a sock.

- If a clue says a Dog was sitting “next to” something, this means the Dog is in the Dog Token position directly to the right or left of that item.

Daisy is sitting next to Beans. Ace is sitting next to the Homework.

- If a clue says a Dog was sitting “between” two other Dogs, this means these are the Dogs to its immediate right and left.

Beans is sitting between Cider and Suzette

- If a clue says one Dog was sitting “to the left” of another Dog, Ace for example, this refers to Ace’s left when he is facing the rug. Beans follows the same rules as the other dogs, even though he is shown facing backwards.

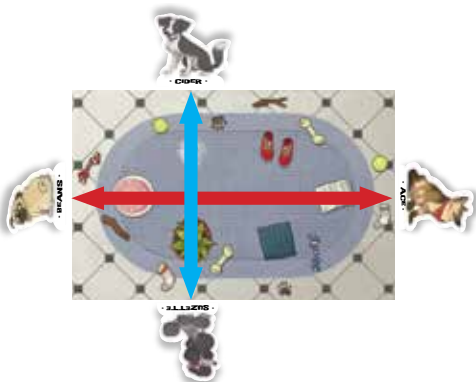

Daisy is sitting to Ace’s right, and Pepper is sitting to Beans’s left.

- If a clue says one Dog was sitting “2 seats” from another Dog, Ace for example, this means the Dog is in the second seat to the right or left of Ace.

Ace is sitting 2 seats from Cider, and 3 seats from Daisy.

- If a clue says one Dog was sitting “across from” another Dog, this means the Dogs are on opposite sides of the rug, directly across from each other.

Beans is sitting across from Ace (red arrow) and Suzette is sitting across from Cider (blue arrow).

- If a clue says a Dog with a certain trait was not sitting in front of a certain item, this means that neither Dog with that trait can be seated in front of that item.

## **CRIME SOLVING TIPS**

- Some clues state the exact location of a Dog by telling you the two forms of evidence in front of where a Dog was sitting. Start with these clues.
- Clues do not have to be used in the order given.
- Look for multiple clues that mention the same Dog and see how you can use these clues together.
- Look to see if you can rule out placements where the information from one clue would conflict with another clue.
